

POLITICAL PARADE

By CLEM WHITAKER

California may be getting the lion's share of defense contracts, as several eastern and middle-western congressmen have bitterly complained but California will also pay a lion's share of the bill—when it comes tax time!

If Congress approves the program drafted by the Ways and Means committee, California's pro rata of the new defense tax bill will total \$226,908,580 annually, which amounts to approximately \$33 for every man, woman and child in the state. That, of course, will be in addition to present Federal taxes collected in California, which aggregate \$460,000,000 per year.

All told, the Golden State will be expected to pungle up \$686,800,000 annually for Uncle Sam, with every probability that the bill will be progressively higher every year that Hitler remains at liberty.

On top of that, the California taxpayer must add his state taxes, his county and city taxes—and district taxes, if he happens to live in a tax district.

Under the new defense tax individual income taxpayers and corporation taxpayers in California will be expected to ante up \$153,787,550 additional, inclusive of corporate excess profit taxes. California, with 2,642,006 automobiles, has the biggest motor vehicle registration in the United States—and the new use tax of \$5 per car is expected to raise \$13,210,030.

Californians, too, drink more than their quota of highballs, so that the increase in the liquor tax, from \$3 to \$4 a gallon, is expected to cost us about \$8,000,000. Boosts in gift and estate taxes (a lot of millionaires live and die here) will raise about \$6,780,000.

Doubled taxes on autos, parts and accessories will take \$4,500,000 a year from California motorists; increased rates on tires and tubes, \$2,676,000; the 10 per cent tax on jewelry, \$2,766,000; the 10 per cent tax on photographic equipment (we have more than our share of candid camera addicts), \$900,000; increased rates on mechanical refrigerators, \$1,260,000; a 10 per cent tax on sporting goods (we play a lot here), \$510,000; the 5 per cent increased tax on candy and chewing gum, \$1,092,000; the soft drinks tax, \$1,356,000; the 10 per cent tax on furs, \$1,242,000; the 5 per cent tax of passenger transportation, \$2,274,000; and the revised telephone-telegraph tax (we talk a lot) \$1,656,600.

And so it goes, down the whole list. Uncle Sam has been generous in defense contracts awarded to California. But California, when all is said and done, pays off generously to Uncle!

Members of the San Jose Junior Theater group were guests of Georgene Lloyd Monday at a swimming party at the W. N. Lloyd swimming pool on Hamilton avenue.

Second Matinee Of Ice Follies to Be Held July 26

A second special matinee performance of the dazzling Ice Follies of 1941, now showing nightly at Winterland, in San Francisco, will be held Saturday afternoon, July 26, it was announced this week. The daytime show was set in response to hundreds of requests, the management stated.

Night showings of the spectacular ice revue continued this week to attract capacity audiences. The great cast of international skating stars and beauties are seen in an entirely new production already acclaimed from coast to coast.

Blending the speed, grace and rhythm of figure skating, ballet and modern dancing into his "white tie and tails" routine, Roy Shipstad, star of the Ice Follies of 1941, can easily be termed the smoothest exponent of sophisticated skating on ice today.

Not content with being the greatest male figure skater in the world, Roy combines the intricate figures of skating with the svelte, polished dancing of such famed "hoofers" past and present as Vernon Castle, Jack Donahue and Fred Astaire.

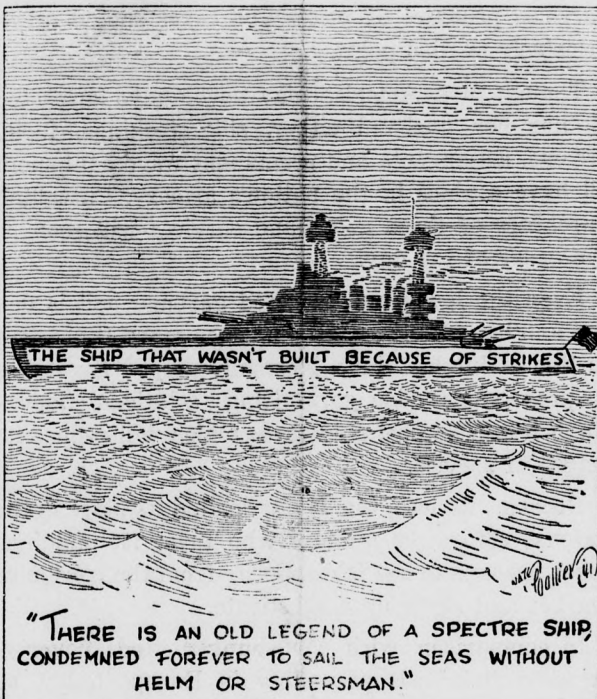

In addition to mastering every known phase of figure skating, Shipstad has carved a number of amazingly original steps with his skates which are incorporated in the 40 different figures which compose his routine. Due to the smooth and seemingly effortless exhibition of the Ice Follies star few people realize that he skims over the shimmering ice surface at the speed of 30 miles an hour.

Recognized as the fastest spin skater in the show, Roy twirls into 180 revolutions during his act, and over a period of ten years he has appeared publicly over 4,000 times. Thus a rapid fumble thum system of mathematics reveals that if all of the spins that Roy Shipstad has done were spun into one mad whirl, they would total upwards of 800,000 revolutions at better than fifty miles an hour or one very dizzy and prolonged headache.

In reference to the dizziness of the spins, Roy readily admits that he does get just a little "spin dizzy." "As an example," Roy says, "in a cross-foot or duck spin, I travel as fast sometimes as 60 miles an hour."

People who disavow any interest in skating, people who "never go to musical shows," people who pride themselves on being hard to please in the entertainment line, have all gone overboard for the Ice Follies this year. —Travel and Recreation committee, State Chamber of Commerce.

"THE FLYING DUTCHMAN"

DEFENSE BOND QUIZ

- Q. What is the price of a Defense Savings Bond?
A. For the smallest Bond, you pay \$18.75. The Bond will increase in value in ten years to \$25. For \$75 you get a Bond which will increase to \$100; other Bonds are in proportion.
- Q. What will the Government do with the money I pay for my Bond?
A. Your money will be put to work at once in the National Defense Program to protect the freedom and safety of the United States, and of all its people everywhere.

NOTE—To purchase Defense Bonds and Stamps, go to the nearest post office or bank, or write for information to the Treasurer of the United States, Washington, D. C.

P. G. and E. to Build Power Plant

Pacific Gas and Electric company is immediately to begin construction of a hydroelectric power plant on the Yuba river, near Smartsville, according to announcement made today. The plant, costing approximately \$1,000,000 will have a capacity of 9,000 kilowatts and will deliver about 60,000,000 kilowatt hours annually. It will operate under the water head developed by the War department's Upper Narrows debris dam.

The project was planned originally by the Sacramento Valley Utility company, all stock and assets of which have been acquired by P. G. and E.

Mr. and Mrs. D. H. Cramer attended an al fresco dinner the home of Mr. and Mrs. S. M. Hatter, Loma Alta avenue, Los Gatos in which the members of the Weavers club of that city and their husbands participated.

Cuttings Return From Motor Trip

Mr. and Mrs. T. A. Cutting have returned from a two-week motor trip up the coast to Seattle, on which they were accompanied by Mrs. Eccles of San Jose.

They found perfect weather during the whole trip by keeping to the scenic coast during hot days. In Seattle they viewed an impressive 4th of July parade of marine and motorized army units, with big guns mounted on high speed trucks, mobile searchlights, shielded machine-gun nests, and anti-aircraft guns.

They visited their son Cecil and the Virginia Mason hospital where he is one of the surgeons.

On their way home, they encountered the army again, this time returning from army games in the south. The motorized divisions stretched almost continuously from Seattle to San Francisco, and were found everywhere along the road, mountain or valley.

Mrs. Anthony Jurras, president of the Campbell High School P. T. A. is calling a special meeting of all program chairmen of the unit for the year, to be held Tuesday afternoon, July 22, at her home on Stevens Creek road. The various chairmen will enjoy a dessert luncheon at 1:30 p. m. after which they will proceed to the business on hand. The important business to be discussed and decided this summer is the program of the various meetings of the year, and the plans for the garden card party to be held in September.

A class in installation procedure was conducted by District Deputy Mrs. Jeanette Rodoni at the Tuesday evening meeting of Ada Rebekah lodge of which Mrs. Ellen Arnold is noble grand. The official visit of Mrs. Rodoni to the lodge will be made Tuesday, August 5.

Bible School Well Attended

The vacation Bible school being conducted at the Congregational church is proving highly successful. Entirely undenominational all churches are represented by the 75 children now enrolled. This number is expected to be materially increased next week.

There are at present nine leaders in charge of the work, but more would be gladly welcomed, and any one who can help is asked to consult Rev. J. H. Bennett.

The classes will be continued all of next week each morning from 9 to 11 o'clock. Bible stories are taught and dramatized, hymns sung and handicrafts for children of all ages taught.

The school was started as an experiment for Campbell and the response shows it is meeting a real need and serving a real purpose.

State Fair to Open August 29

Final plans for an elaborate entertainment program, racing, and a streamlined statewide scrip sale campaign for the 1941 California State Fair, opening August 29 in Sacramento, were to be formulated at a meeting in Sacramento today of Exposition directors.

Headed by Kay Kayser, five top radio bands today had been booked to play for nightly dancing during the 10-day State Fair.

Plans for the nightly stage revue, awaiting board action today, include a brilliant extravaganza to be presented nightly in front of the grandstand on a "miracle stage" and with living scenery featured by an array of foremost stage, screen and radio stars.

Meanwhile, indications today pointed to a record entry list for the harness and running race events for the \$53,700 in purses posted by fair directors, as plans for the 1941 State Fair were being rushed to completion.

With widespread interest being evidenced, entries for the "Girl of the Olden West" contest launched by fair officials were being received today. Prizes totaling \$500 will be awarded to the girls between 16 and 25 years old in eleven western states chosen as typical of the pioneer west. Selection of the winners will highlight Old West Day at the Fair, Sunday, August 31.

In addition to Kayser and his famed band, other bands booked for the nightly dances include Freddie Martin, Ozzie Nelson, Ray Noble and Charlie Barnet and their orchestras, with Harriet Hilliard as featured vocalist for the Nelson troupe.

Vernon Murty of Campbell and Beatrice Thompson, San Jose, will be married Saturday. Murty a professional gardener has been a resident of Campbell for a long time.

First of Kiwanis Ladies Nights Held Tuesday

The initial ladies night meeting of the summer series of the Kiwanis club Tuesday evening was a very pleasant one.

President Joe Gomes presided during the early evening with Ira Abbott introducing the speaker, Mrs. Henry Yow, proprietress of the Chinese Lantern in San Jose.

Mrs. Yow is a very attractive little lady with a pleasing personality and a pleasing speaking voice. Her subject, "Chinese Women of Yesterday and Today" was well developed and gave a clear cut picture of the great contrasts that a comparatively short time has created.

The women of today are organized in various departments and are contributing immeasurably to the support and morale of the army and the citizenry.

Miss Josephine Barbano sang a group of selections, two Chinese airs and a favorite hymn of theirs, "Kites Are Flying High," "Chinese Lullaby," and "Jesus Loves Me, This I Know" followed by "A Heart That Is Free." Mrs. Irma Sanders was her accompanist.

Bowls of midseason flowers, petunias, daisies, marigolds and pompon dahlias decorated the tables and hall.

Next week Sheriff William J. Emig will be the main speaker discussing the duties and problems of his office, and Jack Smith who attended "Boy's State" at Sacramento recently, will describe the workings of that organization. Herold Morton will be chairman for this occasion.

Weston Represents County on Council

Will B. Weston of Santa Clara will again represent Santa Clara county during the coming fiscal year on the executive committee of the Central Coast Council, California State Chamber of Commerce. In addition to his membership on this committee, Mr. Weston is chairman of the agricultural committee.

Announcement was also made of the personnel of the various regional committees. On the agricultural committee is Leroy Anderson, L. R. Cody, G. F. Dodson, Albert Haentze, W. L. Gerrans, V. T. McCurdy, Joseph A. Conner. On the industrial committee is Fred M. Drew and the tax committee is headed by R. V. Garrod.

Mrs. Lawrence Neville of San Jose entertained the Mesdames W. W. Wells of Los Angeles, Howard Lillington of Chillicothe, Ill., and Merlin Bohnett of Campbell, daughters of Mrs. Hattie A. Baugh, at luncheon Wednesday.

ADLESS AIR WAVES

Something new under the sun is due to make its advent soon with construction under way in New York of the nation's first non-advertising radio station. Though privately managed, the station will operate on the same plan prevailing in European countries where broadcasting is government controlled. Listeners will "subscribe" to the station, pay a nominal listening fee, and be required to buy a specially designed radio enabling them to tune in to their station. Such a receiver is necessary, of course, to prevent non-subscribers from dialing into programs. The ordinary radio will encounter only a pig squeal when encountering the adless station.

How many persons will pay for non-advertising radio programs? The answer will largely depend on just how much, or how little, the average listener is now irked by commercial announcements interjected so frequently in the programs he listens to.

The record of America's adless newspapers, it is worth noting, has been anything but successful. Though there have been numerous attempts, all past ventures in the field have failed. The latest is the newspaper PM, still running deeply in the red.

The country's first experiment with an adless broadcasting station will soon indicate whether non-advertising radio waves will fare better than the non-advertising newspaper.

INSTALLMENT PLAN TAXES

If there is any way to ease the blow of paying our income tax—we're for it. And so is everybody else, we venture to assume.

Next month the government will provide such a method—a system permitting taxpayers to buy "tax-anticipation notes" out of current income, and store them up at interest until tax time comes around. After August 1st the new notes will be on sale in denominations of from \$25 to \$100,000, which makes it convenient for little taxpayers and big ones alike. Banks have long urged such a system and some have set up a "lay away" plan of their own to help clients face the tax collector with money in hand.

It is a sound program and a helpful one—saving for tax purposes or for any other purpose. It is pleasant to find the good old institution of "saving for a rainy day" well regarded again; it was lost for so long behind the newer philosophy of "spending ourselves rich."

WHEELMANSHIP PLUS!

It was no enviable record that California made for itself in outdistancing the 47 other states in traffic fatalities, with a toll of 49 deaths during the three-day Independence Day week-end.

By June 1, California's highway homicide had claimed the lives of 1,243 persons, a gain of 16.9 per cent over the first five months of 1940.

Though highway engineers have wrought amazing achievements in building safer traffic arteries, death stalks the highways today more menacingly than ever before. It may well be, as some traffic experts assert, that the present method of licensing drivers is so inadequate as to be little better than useless. The ability to drive a car around the block is no guarantee of physical or psychological fitness to operate a vehicle. In the period since 1927 passenger car fatality rates show an over-all gain of 18 per cent.

Able wheelmanship, which demands courtesy as well as skill, is one thing highway engineers can't provide, but it is the one thing above all others which can reduce homicide on our highways.

A TIP FROM THE OPM

With an eye to the future, the OPM is beginning to throw out a few broad hints regarding those items where Mr. and Mrs. America can begin some domestic and voluntary rationing of their own.

It won't be patriotic, an OPM official points out, to buy either a yacht or two automobiles during the current emergency. By and large, that admonition shouldn't be hard for the public to take. The double-barreled pressure of prices and taxes should speak decisively on this point.

Though Mrs. America may never have suspected it, nor her husband either, silk stockings, facial creams, astringents and permanent wave equipment all have a place in the nation's armory. Curtailing purchases of these goods and services will soon be the order of the day.

Even the lowly and dejected garbage pail is due for another blow in addition to the many it receives in line of kitchen duty. Normally dipped five times in preservative zinc galvanizing solutions, henceforth it will receive only three which will reduce its length of service.

Because, tapioca, too, is due to find its place in the defense effort the millions who favor its puddings must prepare to see it disappear from the consumer market and rustle up a substitute.

In comparison with the hunger and poverty-stricken standards prevailing in Europe today, or measured against the stiff rationing in England, we have been blessed with rare good fortune that our sacrifices, to date, have been so few.

* * * * *

CALIFORNIA LISTENS IN

Putting a stop-watch on the pace of armament production to date, an authoritative survey covering 16 of the nation's major industrial areas has found that program marching ahead at a favorable rate.

The only serious menace to its onward course is that of possible shartages. With defense needs already consuming 60 per cent of the country's total steel production, small manufacturers in non-defense work face critical shortages of such materials as strip and sheet steel.

The instance has come to light of a California manufacturer who, with a year's supply of essential materials on hand, suddenly found his entire stock requisitioned by the government. On the other hand, there is the more typical example of the manufacturer of women's apparel who has now turned over part of his plant to the making of parachutes. However, the newly created Defense Contract Information office in Washington, D. C., is proving a boon to the state's businessmen and manufacturers, harassed or bewildered by lack of knowledge of the part they can play in building the sinews of defense.

All information regarding priorities and defense contracts is relayed directly to branch banks in hundreds of communities all over the state. That, in effect, puts a defense listening post in every part of California, an advantage enjoyed by no other state.

What Uncle Sam wants and needs is today the nation's first order of business. An alert California is making it her job to help his business.

* * * * *

HELP OR HINDRANCE?

Bidding farewell the other day to one of his army divisions leaving to join the German army on the Russian frontier, Il Duce waved his hand and imperiously cried, "Go—and repeat your former triumphs!" Those words, if they reached the German G. H. Q., must have brought a shudder of uneasiness to staff commanders as they recalled the triumphs of Mussolini's militia in Spain, Greece, and Ethiopia. If victors of that stamp are repeated, Russia alone will reap the reward.

Salinas Rodeo Starts Today

One of the west's fastest, rip-snortingest roundups of ornery bulls, buckin' horses, and hard-ridin' cowhands is the four-day California Rodeo to be held at Salinas July 17-20.

Riders and ropers from all over the country will compete and a full program of "extra special" entertainment will be provided.

The preliminary Kiddies Kapers Parade takes place Wednesday evening, July 16. Thursday starts with the famous Outdoor Girl parade. Each of the four days, there will be the colorful horse parade starting at 1:00 p. m. with rodeo events popping at 2:00. The U. S. Artillery from Fort Ord will give a demonstration each of the four days. The "Colmo del Rodeo" celebration comes off Saturday night, July 19. An army band is scheduled to furnish music.

Among honored guests will be Lt. General John L. De Witt, commanding general of the Fourth Army; Maj. General E. D. Peek, 9th Corps Area; Maj. General J. W. Stilwell, 7th Division; Maj. General Walter K. Wilson, III Army Corps; Gene Autry, Leo Carrillo and Jean Parker, movie stars.

No Trucks
No truck trails or highways are permitted in large areas of national forests set aside as "wilderness areas" or "roadless areas," and travelers wishing to enter such primitive stretches of back country have to travel afoot or horseback as the pioneers did.

A quantity of yarn for Red Cross knitting has been received by Mrs. Nellie Mills, and she is urging any women who can help with the work to call at "The Manse," North Central avenue, or on Wednesdays at the community hall, in the library building, where the Red Cross workers meet.

Campbell was represented in Reno Wednesday with marriage licenses issued to Harry W. Anderson of San Jose and Dorothy M. Perricone of Campbell, and James Nelson and Pauline Buie both of this community.

Christian Science Churches

"The Lord will command his loving kindness in the daytime, and in the night his song shall be with me, and my prayers unto the God of my life." These words from Psalms comprise the Golden Text to be used Sunday, July 20, in all Churches of Christ, Scientist.

The subject of the Lesson-Sermon will be "Life." Included among the Scriptural selections will be passages from Psalms 36, 7, 9 and a passage from the Christian Science textbook.

Paul Davies Named Director Of Bank

Paul L. Davies, prominent San Jose industrialist and president of Food Machinery corporation, has been elected to the directorate of American Trust company, according to announcement just made by James K. Lohead, president of the bank. In making the announcement, Mr. Lohead said, "We have invited Mr. Davies to become a member of our bank's board because of his wide knowledge of industry, agriculture and banking."

Mr. Davies has been president of Food Machinery Corporation for the last two years, being elected to that post after serving as executive vice president. From 1924 to 1928, he served the American Trust company first as assistant cashier and then as vice president.

A graduate of the University of California and the Harvard School of Business, Mr. Davies is consulting professor of industrial management in the Stanford University Graduate School of Business, and is a member of the Committee on Economic Policy of the National Association of Manufacturers.

Serving with him on the company's board of directors are: Frazer A. Bailey, Wakefield Baker, Edward H. Clark, Colbert Coldwell, Peter Cock, Charles Elsey, B. R. Funsten, A. Crawford Greene, Henry Hawes, J. R.

The Perpetual Preparedness Program

By BETTY BARCLAY

The menfolk are getting a great kick out of their preparedness program. One would almost think they had discovered something new.

But the Boy Scouts have been following "Be Prepared" for over a quarter of a century and we women have had to be prepared since the original Adam said, "Eve! Have that mastodon steak ready at sun-down, or else!"

The female of the species has always had a preparedness program in the home. Breakfast must be prepared on time, day after day, month after month, and year after year. So must lunch and dinner. She has developed preparedness into a science. Measuring spoons, broilers, boilers, canned goods, bottled tastes and hundreds of other conveniences have been developed as aids to this universal, perpetual, perfection, preparedness program.

Here are a couple of recipes for the great army of always-prepared women. They explain the preparation of tasty dishes that are healthful and economical. The cooked, dried Lima beans shown in the illustration now come in cans. They lend themselves to scores of dishes as delicious as those below. This concentrated food is rich in protein, carbohydrate and energy value, and is a valuable source of calcium, phosphorus, iron and

calcium salts. Furthermore, dried Limas are exceptionally high in alkalinity. Try the following recipes as preparedness for company surprises:

Limas Creole

2 cups cooked, dried Limas
3 slices bacon
2 medium onions, sliced
1 green pepper, shredded
1 cup milk

Fry bacon, remove from pan, add onions and green pepper. Cook until tender. Place a layer of Limas in a buttered casserole, add a layer of bacon, broken in pieces, then a layer of onion and pepper mixture. Sprinkle lightly with salt. Repeat. Pour over milk and bake in a moderate oven (350° F.) about 20 minutes.

Savory Limas

2 cups cooked, dried Limas
2 tablespoons minced onion
1 clove garlic, chopped
(may be omitted)
1 tablespoon oil or butter
3 tablespoons minced green pepper
1 cup tomato sauce or strained tomato

Heat oil, add onion, garlic and green pepper; cook over a moderate heat 5 minutes; add tomato sauce and Limas. Simmer over a low fire until thoroughly heated, about 15 minutes.

made him all the more lovable. And take it from The Book Mark, he really enjoyed a good fight. Just let me give you one incident the author so ably tells about the parson when he stepped in on a fight the Ladies' Aid was having over who was going to be president of the Society. "I came, he said, 'because I knew this would be a capital scrap. I have seen you women battling for the Lord shoulder to shoulder so often that I wanted to see what you are like toe to toe.'" "I like a good fight," he said. "The Bible is full of battles. But the wars that were successful were those the Children of Israel fought together against a common foe. It wasn't until they began fighting among themselves that they were conquered." He sure enough settled that scrap. There are dozens of sparkling stories of the Parson's predicaments and his felicitous means of getting out of them. He was a fellow who made Christian living fun. And his son, the author, has gathered a good bunch of that spirit and penned it together to make "One Foot In Heaven" a huge pack of fun to read. Mark my word, 'cause I'm the Book Mark, I've been through the book and I know. It's great.

Procurable at The What Not lending library.

THE BOOK MARK

by Marty

If I were anything but just a book mark I would laugh right out loud, however, as I am nothing but a slip of paper that holds a reader's place in a book, there isn't much I can do when I'm amused, highly entertained and down right tickled but maybe curl up the edges of this book. Hartzell Spence, a Methodist minister's son, has written a book entitled "One Foot In Heaven." Now this book is not one to preach religion, but if you're asking me, it preaches much more Christianity and every-day common sense than many a book I've had the pleasure of marking in months. The author, who tells the story of his father's life as a Methodist minister, has a delightfully happy way of putting his incidents over to the reader.

The parson had an awfully good time with his work. He was a practical man, though, intensely so, but that

PACIFIC GAS AND ELECTRIC COMPANY

LEGAL NOTICES

NOTICE TO CONTRACTORS

Notice is hereby given that sealed proposals for the construction of an addition to the Campbell Union Grammar School will be received by the Campbell Union Grammar School District at the office of the Board in the Campbell Grammar School, on the N. E. corner of Campbell Ave. and Winchester Road, Campbell, Calif. on or before 8:00 o'clock P. M. of the 31st day of July, 1941, in accordance with the plans and specifications for said work on file in the office of said Campbell Union Grammar School District.

Plans and specifications may be obtained at the office of Binder & Curtis, Architects, 25 West San Carlos Street, San Jose, Calif. A deposit of \$15.00 will be required for copies of said plans and specifications. Said deposit will be refunded upon return of the plans and specifications in good condition.

Each bid must be accompanied by a certified check or bid bond in the amount of ten percent of the amount bid as liquidated damages in case the successful bidder fails to furnish satisfactory bonds within ten days from the date of award. Certified checks shall be drawn on some reliable bank and made out in favor of the Campbell Union Grammar School District.

All bids shall be addressed to the Campbell Union Grammar School District and shall be enclosed in sealed envelopes and plainly marked "Bid for Addition to Campbell Grammar School."

Bids will be received as aforesaid and will at said time and place above mentioned be opened in public.

Said Campbell Union Grammar School District reserves the right to reject any and all proposals and to waive technical formalities in any proposal.

Preference in employment of labor must be given to bona fide residents of Santa Clara County.

Workmen employed on the work must be paid in accordance with the scale of wages adopted by the Campbell Union School District, as follows:

Craft	Hour	Day

Therapeutic Value

The therapeutic value of poetry writing has been proved among patients suffering from cardiac ailments, tuberculosis, and other diseases, according to Miss Elizabeth Reynard, assistant professor of English at Barnard college, Chautauqua, N. Y.

Olivia de HAVILLAND
star of the Warner Bros. picture, "Snowy White and the Seven Dwarfs," recommends **Calox Tooth Powder** for teeth that shine.

CALOX TOOTH POWDER

INDIGESTION

Gas trapped in the stomach or gullet may act like a hair-trigger on the heart. At the first sign of distress smart men and women depend on Bell's Colox Tablets to get the gas out. No laxative but made of the fastest-acting medicine known for acid indigestion. If the FIRST DOSE doesn't prove Bell's Colox a better, return bottle to us and receive DOUBLE MONEY BACK. 25c.

OUR HIGH SCHOOL

BOYS PHYSICAL EDUCATION

The aims and objectives of the boys' physical education program is to develop strong, healthy bodies and also to develop a spirit of fair play and sportsmanship among boys so that as they grow older they may lead happier and more useful lives. The boys also learn how to get along in groups and to develop leadership. These aims are achieved through participation in various sports and activities.

The physical education program is organized around three major activities: first, the regular daily physical education class. The program in this activity consists of participation in the following games: six-man touch football, basketball, soccer, handball, tennis, softball, track, horseshoes and volley ball. Second, the intra mural program. We are greatly interested in this program because it enables all of the boys to develop considerable skill in one or more sports. Teams are organized in each physical education class and through a process of elimination the champion team is selected in each sport. All of the boys in the school participate in this program. Third, the inter-scholastic athletic program. In this activity teams are developed for competition with other schools. Our students participate in the following: football, basketball, track, baseball, tennis, and wrestling. About 150 boys take part in these activities.

Through these various activities it is hoped to develop an "all-around boy."

Instructors are Mr. Drummond, Mr. Hudson and Mr. Noddin.

HOME ECONOMICS

Miss Gardner - Miss Stedman
Home Economics deals with the personal activities centered around the home life of the girl. Her problems involve making judgments and comparisons, and in selecting the suitable and caring for it.

More skill of construction or of manipulation is only a means to an end—to give more than a saving in dollars and cents in developing high ideals, trained taste, and standards whether for food, clothing, room furnishing, in-

Lydia Pinkham's Compound is one medicine you can buy today made especially for women. Telephone your druggist right now for a bottle. WORTH TRYING!!

Pineapple Curry Dressing Adds Special Palate Appeal to Salmon Salad

By BETTY BARCLAY

Here's a new version of that ever-popular dish — salmon salad — which is sure to win friends and influence appetites. It makes its appearance just in time to add variety to menus during the many meatless days that come during the Lenten season.

Chill the salmon thoroughly in the can before opening. Then drain well and flake. Combine with a little chopped green pepper and diced celery. Add a dash of lemon juice, and blend with pineapple juice curry dressing mixed with an equal amount of mayonnaise. Press the salad into a mold, and chill for one hour. Unmold and surround with slices of crisp, unpeeled cucumber, and hard cooked eggs. Garnish with parsley, or water cress, and radish roses.

Hubert W. Morrison of San Francisco and Jessie Mae Benefiel of Campbell were applicants for a marriage license last Friday.

Airplane Silencer

A Montreal inventor has developed a silencer for airplane engines up to 1,000 horsepower that cuts out 70 per cent of the noise without causing excess pressure.

Individual spending, or personal grooming.

Practice comes in the making of various garments; preparing, cooking and serving meals; the study of social usage, etiquette, and hospitality.

A Dab a Day keeps P.O.* away!

(*Underarm Perspiration Odor)

YODORA DEODORANT CREAM

— isn't stiff or sticky! Soft—it spreads like face cream.
— is actually soothing! Use right after shaving—will not irritate.
— has light, pleasant scent. No sickly smell to cling to fingers or clothing.
— will not spoil delicate fabrics.

Yet tests in the tropics—made by nurses—prove that Yodora protects under trying conditions. In tubes or jars, 10c, 25c, 60c. McKesson & Robbins, Inc., Bridgeport, Conn.

Laughing Around the World
With IRVIN S. COBB

A Problem in Short Division

By IRVIN S. COBB

NOBODY ever denied that the French, Mexican and Italian table d'hote restaurants of San Francisco in the old days served good food, but before screens for the kitchens and pantries and dining-room

windows came into vogue there occasionally was complaint on a different score.

For instance, a rather particular gentleman was entertaining three of his friends at luncheon in one of the most popular of the ancient establishments. The entree came on. The host looked at it and hailed the attendant:

"See here, waiter," he said, "there are only three flies in this omelette. Now I must insist that the next time I order an omelette for four here, you have either four flies in it or no flies at all. It's a very hard matter to divide three flies equally among four people."

SAVE FOR RAINY DAYS
10% GAS HEATING EQUIPMENT
BUY NOW PAY LATER
Save your 10% on Gas Heating Equipment by buying this month. No monthly payments until after October 1st.

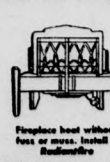

Your present heating equipment may be giving you poor service. Perhaps it is not delivering heat as fast as it should. Or it may be balky and bothersome and becoming more and more expensive to operate. The remedy is to put in NEW Gas Heating Equipment, and the time to put it in is NOW, when you can save money.

If you have an old furnace, by all means buy and install one of the new blower-type furnaces that filter out all the dust and grime that is picked up in the house when warm air is circulated. Be wise—modernize, and save money.
